Experiences

Woby - Fullstack Developer 12/2022 - 08/2023 (Paris, Île-de-France)

- **Analyzed** requirements and **designed** an efficient solution for the simultaneous **storage and retrieval of thousands of profile photos**.
- Set up the architecture on **AWS**, leveraging **S3** for photo storage.
- **Developed custom reports** to help users visualize their data.
- **Implemented Lambda** to **automate report** generation and updates.
- **Improved user experience** by providing actionable insights for decision-making.
- Employed **Clean Code** principles.

Orange - Backend Developer 10/2021 - 10/2022 (Arcueil, Île-de-France)

- Conducted an **analysis of existing processes** to identify opportunities for optimization.
- **Designed a serverless solution** on Google Cloud to improve data analysis and support decision-making for an internal team.
- Employed technologies like **Node.js** for the development of the solution.
- **Established a regular data flow** from multiple sources to BigQuery **for efficient data storage and analysis**.
- Connected data in **BigQuery** with Google Data Studio to facilitate graphical data visualization.
- Developed interactive dashboards that enable the internal team to effectively **monitor and analyze** data.
